ARTÉA • WORLD THREE SIMPLE DEVELOPER GUIDE

CREATOR'S LIGHT

Story Journey, Identity Tracking, Quests, Combat, Boss & World Building

Creator's Light Kingdom production concept — Magic / Creativity leads; Technology and Nature support the experience.

IDENTITY PHRASE A blank world where one brave mark becomes a bridge, a garden, and a light.

Version 1.0 • 14 August 2026 • Prepared for David Sovann and the ARTÉA team

DOCUMENT ORIENTATION

How to use this guide

A simple shared reference for story, level design, environment art, gameplay, audio, UI, accessibility, and Godot implementation.

Purpose

This guide turns the proposal for Creator's Light Kingdom into one short playable journey. It follows the same structure and visual language as the World One guide while keeping the scope small enough for a practical Godot production.

DESIGN MANDATE The game never grades art and never asks for a perfect picture. Sword combat only breaks Blank Blight armour that blocks creation. The final victory is the courage to place an unfinished idea.

Guide contents

- 1. World identity and the three-force design balance
- 2. Continuing 16-identity tracking system
- 3. Player journey from train arrival to the next unlock
- 4. Timing, quests, learning prompts, rewards, and XP
- 5. Godot-friendly enemies, sword combat, and boss flow
- 6. Level route, required objects, and visual reference board
- 7. Technical rules, accessibility, save data, and build checklist

Production target

Target	Decision
First-play time	14–16 minutes as part of the previously agreed three-world 55–70 minute campaign
Quest count	2 main quests + 1 boss encounter
Combat scope	3 normal enemy types + 1 boss; all use readable state loops
Identity scope	8 optional micro-decisions; 2 for each identity axis
Level shape	One linear route with shortcuts and a clear return to the train

PART 1

World Identity

Creator's Light Kingdom gives one force a strong visual lead while the other two remain visible and useful.

Identity field	Approved direction
Chapter theme	I was created to create.
Dominant force	Magic / Creativity
Supporting forces	Technology and Nature
Treasure	Creator's Light
Guardian	Uriel — imagination, courage, and new beginnings
Player guide	Mayor Milo — explains the mission, demonstrates the frame tools, and adds light at the finale
Opening state	World Two is complete. Creator's Light is now available on the train Destination Wheel.
Completion unlock	All stations, all Crown Railway routes, free travel, and the Art Castle finale

How the three forces combine

Force	Visual share	Use in this world
Magic / Creativity	55%	Drawings and stamps become real objects; light and colour answer the player's ideas.
Technology	25%	Creation Frames, projectors, tool palettes, scanners, and train controls make ideas usable.
Nature	20%	Glass seeds grow into plants, silver pipes become rivers, and the empty land becomes alive.
WORLD RULE A blank world where one brave mark becomes a bridge, a garden, and a light.		

Story overview

The player rides the train into a nearly empty kingdom. Uriel explains that the world is waiting for one small mark, but the Perfect Blank keeps whispering that nothing is ready or good enough. Using a simple Creation Frame, the player makes bridges, doors, trees, and lights, fights Blank Blight creatures, and brings colour back to the land. The player defeats the Perfect Blank's armour, places an unfinished picture, and receives the Creator's Light. All train routes open and the Crown Railway returns to the Art Castle finale.

PART 2

Continuing 16-Identity Tracking

World-specific choices quietly add evidence to the same four-axis identity record used across the full ARTÉA journey.

PLAYER PROMISE The result is a friendly mirror, not a diagnosis. The player may skip any identity choice, and no answer changes XP, combat power, treasure, or quest success.

Shared scoring model

Axis	A	B	What it watches
Energy	E — outward connection	I — inner reflection	How the player prefers to recharge or share
Information	S — clear detail	N — possibility	How the player notices and imagines
Decision	T — logic	F — values	How the player weighs a choice
Approach	J — plan	P — adapt	How the player moves through a task

Eight short moments in this world

Each moment adds one point to one side only after a deliberate player choice. A neutral or skipped response saves the moment as complete but adds no point. Never show a ‘correct’ animation.

ID	Moment	Choice A	Choice B	Score
CL_ID_01	First idea	Discuss it with Milo	Sketch privately first	+E / +I
CL_ID_02	Studio work	Create beside Milo	Create alone, then share	+E / +I
CL_ID_03	Entry shape	Imagine an unusual possibility	Start from the visible shape	+N / +S
CL_ID_04	Living landscape	Connect symbols into a story	Build a practical object	+N / +S
CL_ID_05	Bridge choice	Pick the clearest solution	Pick what comforts creatures	+T / +F
CL_ID_06	Reflection	Explain how it works	Explain what it means	+T / +F
CL_ID_07	Stamp plan	Plan every stamp first	Place one and adapt	+J / +P
CL_ID_08	Final picture	Choose an order before starting	Start unfinished and respond	+J / +P

The 16 friendly identity names

The final four-letter result is calculated only after all three worlds. Use the friendly name first and keep the code secondary. A tie uses the most recent deliberate choice; if still tied, show two possible names and let the player choose.

Code	Friendly name	Code	Friendly name
ISTJ	The Steady Keeper	ISFJ	The Caring Guardian
INFJ	The Quiet Guide	INTJ	The Vision Builder
ISTP	The Skillful Explorer	ISFP	The Gentle Artist
INFP	The Hopeful Dreamer	INTP	The Curious Inventor
ESTP	The Brave Adventurer	ESFP	The Joyful Performer
ENFP	The Spark Starter	ENTP	The Idea Challenger
ESTJ	The Strong Organizer	ESFJ	The Community Builder
ENFJ	The Heart Leader	ENTJ	The Bold Pathfinder

Save data required

Field	Type	Purpose
identity_scores	Dictionary	Eight integer totals: E, I, S, N, T, F, J, P.
identity_moments	Dictionary	Moment ID to chosen option, neutral, or skipped.
identity_result	String	Calculated code after World Three; empty before the finale.
identity_name	String	Friendly name selected or accepted by the player.
identity_consent	Boolean	Whether the player wants the result shown and saved.

IMPLEMENTATION Store identity data in the campaign SaveData resource. Do not keep separate world-only profiles and never reset scores at a station.

PART 3

The Player Journey

Read this section in order: it follows what the player sees, learns, fights, earns, and unlocks from the train arrival to the world ending.

Simple journey map

1. Ride the Crown Railway into the new kingdom.
2. Meet the guardian and hear the problem and mission from Milo.
3. Complete Quest One and learn the world's main interaction.
4. Complete Quest Two and prepare the final route.
5. Fight the boss in three clear phases.
6. Receive Creator's Light and unlock All stations, all Crown Railway routes, free travel, and the Art Castle finale.

1. Train arrival — the world waiting for a mark

The train reaches a white station surrounded by floating shapes, empty frames, plants sleeping in glass seeds, and rivers held inside silver pipes. Milo and the player meet Uriel, who gives the player a glowing Creation Frame. The Perfect Blank has covered the road and trapped Creator's Light.

- Walk to the Entry Frame and learn four large tool buttons: bridge, door, tree, and light.
- Place one stamp; the frame spawns a safe prebuilt 3D object in the world.
- Defeat two Ink Sprites and open the first colour gate.

STORY NOTE Uriel: "You do not need a perfect idea. Make one small mark, and the world will answer."

2. Quest One — Wake the first creations

At the Bridge Gap, the player selects a bridge stamp and a colour. The picture becomes a real bridge. At the Dream Door, another simple creation opens a hidden route. Ink Sprites and Smudge Hoppers try to erase the new objects, so the player protects each creation with the sword.

- Create one bridge from three safe templates; every template reaches the same destination.
- Create one door and choose where it appears in a marked placement zone.
- Fight two Ink Sprites and one Smudge Hopper; restore the objects at a repair pedestal if needed.

STORY NOTE Milo: "Your first idea can be small. We only need enough to take the next step."

3. Quest Two — Grow the living artwork

The path reaches the Glass Seed Garden and Creator Studio. A tree stamp wakes the sleeping plants, and a light stamp changes the silver pipes into a flowing river. The player chooses colours and shapes for the studio display. Blank Sentinels guard the last colour anchors, but their shields fail when a nearby creation is active.

- Create one tree and one light; use the new tree as cover and the light as a shield-break signal.
- Defeat two Blank Sentinels using a clear shield-open, sword-attack loop.
- Place one creation on the studio plinth and answer, keep private, or skip Milo's reflection question.

STORY NOTE Milo: "You may explain your picture, keep the meaning private, or move on. All three are allowed."

4. Boss — the Perfect Blank

The Perfect Blank fills the final arena with white armour and tells the player that nothing is ready. The player restores three colour anchors, creates a way across the empty floor, and uses the sword to break the Blank Blight shell. The last task is not another attack: the player places an unfinished picture. Milo adds a point of light, and the whole kingdom grows around it.

- Phase 1: defeat Ink Sprites and restore three colour anchors.
- Phase 2: create a bridge, door, or light path; attack the exposed shell.
- Phase 3: break the last armour layer and place any unfinished picture to complete the encounter.

STORY NOTE The game accepts every valid stamp, colour, and composition. There is no quality score.

5. Reward — Creator's Light and the Castle finale

Creator's Light appears as a flame carrying colours from the player's creation. Uriel thanks the player, and the train returns to the Gallery. Wisdom, Harmony, and Creativity join as the Light of Identity. Every station and route opens for free travel, and the player may enter the Art Castle finale to receive the Crown of Life and choose one of the 16 friendly identity names.

- Save Creator's Light, World Three completion, and the creation recipe IDs.
- Unlock all Crown Railway destinations and free travel.
- Calculate the 16-identity result and let the player accept, rename, retake, or skip it.

STORY NOTE Uriel: "Your creativity is a gift that only you can share with the world."

PART 4

Timing, Quests, Learning Prompts & Rewards

Keep the chapter short, readable, and generous. Identity choices and learning prompts never remove rewards.

First-play timing

Section	Time	Included play
Arrival and Creation Frame	1–2 min	Station, Uriel, four-button creation tutorial, two Ink Sprites
Quest 1: Wake creations	4 min	Bridge, door, placement zone, simple combat
Quest 2: Grow the artwork	4 min	Tree, light, glass seeds, Blank Sentinels
Boss: Perfect Blank	4–5 min	Colour anchors, creation path, armour fight, unfinished picture
Reward and Castle return	1 min	Creator's Light, all routes, identity finale

Quest and unlock table

Step	Main objective	Reward	Story unlock
Quest 1	Create bridge and door	40 quest XP + enemy XP	Bridge and door recipes saved
Quest 2	Wake nature and light	45 quest XP + enemy XP	Perfect Blank arena opens
Boss	Begin before everything feels perfect	80 boss XP	Creator's Light + all train routes

Short learning prompts

Place	Prompt	Implementation / hint
Entry Frame	What is the smallest mark that can begin?	Any stamp; the tutorial highlights one only if the player waits.
Bridge Gap	Which creation makes a safe crossing?	All three bridge templates are equally correct.
Glass Seed Garden	What could help this place grow?	Tree or light; both reach the same progression state.
Final picture	Does the picture need to be finished?	No. Any non-empty composition completes the story action.

QUIZ RULE A wrong answer gives a helpful response and an immediate retry. It never removes health, XP, identity points, treasure, or access.

PART 5

Sword Combat, Enemies & Campaign XP

All enemies are small, readable, and possible with standard Godot scenes, navigation, timers, hitboxes, and animation states.

Enemy roster

Enemy	HP	XP	Simple behaviour loop	Player answer
Ink Sprite	25	5	Short dash, one ink swipe, long pause	One clean sword hit; simple CharacterBody3D chase
Smudge Hopper	50	10	Jump to marked circle, splash, two-second recovery	Leave circle, then use two hits
Blank Sentinel	100	20	Shield walk, slow beam, recovery	Activate a nearby creation to open shield
Perfect Blank	250 shell/core	80	Three scripted phases; two attacks per phase	Boss state machine; final creation interaction

Shared Godot enemy scene

Node / resource	Purpose
CharacterBody3D	Enemy movement and collision. Stationary enemies may use Node3D instead.
NavigationAgent3D	Simple chase path; stop before attacks and never chase outside the arena.
Area3D Hurtbox / Hitbox	Receive sword damage and apply enemy damage with separate collision layers.
AnimationPlayer	Telegraph, attack, recovery, hit, and defeat animations.
Timer	Attack cooldown and readable recovery window.
EnemyData Resource	HP, XP, speed, damage, and scene references without copied scripts.
State enum	IDLE → CHASE → TELEGRAPH → ATTACK → RECOVER → HIT → DEFEATED.

Campaign level rule

- Expected campaign range: Level 4 at arrival and Level 5 after completion. Never reset the player's level at the station.
- Normal enemies award XP once. Quest and boss rewards are saved immediately.
- Identity decisions, quiz answers, accessibility assists, and reflection skips give no XP difference.
- If balancing changes global thresholds, keep the world reward total proportional rather than adding more enemies.

PART 6

Boss Encounter

The boss uses combat because the hero carries a sword, but the story ending remains restorative instead of violent.

Final encounter: Perfect Blank

Phase	Threat	Player task	Completion state
1 — Add colour	Ink Sprites protect three blank anchors	Defeat adds; activate three colour anchors	Arena gains safe colour lanes
2 — Make a way	Blank shell covers the central floor	Create bridge, door, or light; strike exposed shell	Path stays and final core opens
3 — Courage to begin	Core repeats wide erase waves	Dodge, break last armour, place unfinished picture	World grows; Creator's Light appears

Boss implementation

- Use one BossController with explicit INTRO, PHASE_1, TRANSITION, PHASE_2, PHASE_3, RESTORE, and COMPLETE states.
- Lock progression triggers while a transition animation is running; save only after COMPLETE.
- Show attack zones on the ground for at least 0.75 seconds and provide high-contrast and reduced-flash settings.
- If the player falls, restart the current phase with full healing items; do not replay the whole world.
- The final story action is an interaction prompt. Sword damage cannot trigger the treasure reveal by itself.

BOSS ACCEPTANCE The game never grades art and never asks for a perfect picture. Sword combat only breaks Blank Blight armour that blocks creation. The final victory is the courage to place an unfinished idea.

PART 7

Level Route & Required World Objects

Build one understandable journey. Reuse modular pieces and keep decorative density lower around combat, prompts, gates, and train controls.

Linear route

#	Area	Player purpose
0	Art Castle Gallery	Choose Creator's Light after completing Heart Melody.
1	Creator Station / Entry Frame	Arrival, Uriel, simple Creation Frame tutorial.
2	Bridge Gap	Bridge creation, Ink Sprites, first colour anchor.
3	Dream Door / Glass Seed Garden	Door placement, tree creation, Smudge Hopper.
4	Creator Studio / Light River	Light creation, Blank Sentinels, reflection choice.
5	Perfect Blank Arena / Uriel Court	Boss, Creator's Light, return to Castle finale.

Important object groups

Ref.	Object group	Purpose for designer / developer
01	Creator Station and Entry Frame	World entrance, Uriel briefing, four-button tutorial, return point.
02	Creation Frame and stamp workstation	Simple 2D tool UI; stores stamp, colour, rotation, and slot IDs.
03	Creation set: bridge, door, tree, light	Four reusable prebuilt 3D scenes with three visual variants each.
04	Glass seeds and silver river pipes	Nature puzzle props that wake after tree and light creations.
05	Creator Studio and gallery plinths	Shows the player's chosen recipe; supports private/answer/skip reflection.
06	Perfect Blank arena, Uriel, and flame	Final combat, colour anchors, unfinished-picture action, treasure reveal.

Simple dressing kit

- 6 modular ground pieces: straight, corner, T-junction, small plaza, stairs, and arena edge.
- 3 large landmarks, 6 medium landmarks, and 12 small props; reuse materials and colour variants.
- 1 checkpoint style, 1 interaction pedestal, 1 quest marker, 1 locked gate, and 1 unlocked gate.
- 3 terrain plants, 3 rocks/crystals, 2 lamps, 2 benches, 2 signs, and 3 particle effects.
- Keep a clear 2.0–2.5 metre walkable path and avoid placing props inside enemy or camera safety zones.

PART 8

Object Architecture Reference

This board gives the art team a shared shape language. The numbered table states what each group must do in the playable build.

Creator's Light Kingdom object reference board. Treat forms and colours as direction; use the purpose table as the implementation authority.

Ref.	Object name	Required gameplay purpose
01	Creator Station and Entry Frame	World entrance, Uriel briefing, four-button tutorial, return point.
02	Creation Frame and stamp workstation	Simple 2D tool UI; stores stamp, colour, rotation, and slot IDs.
03	Creation set: bridge, door, tree, light	Four reusable prebuilt 3D scenes with three visual variants each.
04	Glass seeds and silver river pipes	Nature puzzle props that wake after tree and light creations.
05	Creator Studio and gallery plinths	Shows the player's chosen recipe; supports private/answer/skip reflection.
06	Perfect Blank arena, Uriel, and flame	Final combat, colour anchors, unfinished-picture action, treasure reveal.

MODELLING RULE Build the large silhouette and gameplay collision first. Add small decoration only after the object works at the correct camera distance.

PART 9

Technical, UI, Audio & Accessibility Rules

Keep the systems modular, saveable, readable without one sensory channel, and small enough to test every week.

World-specific implementation

- Do not convert free drawings into new 3D meshes. Save a small recipe: stamp ID, colour ID, rotation, and placement slot.
- Each stamp spawns a tested prebuilt PackedScene. All variants must keep the same collision and gameplay function.
- Use a SubViewport or Control-based frame UI only for display; world spawning is handled by a CreationManager signal.
- The game never grades art. A non-empty recipe is valid, and answer/private/skip reflection choices give no XP difference.

Required save flags

Field	Purpose
world_three_started	Set after the station arrival finishes.
world_three_quest_1	Set after Quest One reward and checkpoint.
world_three_quest_2	Set after Quest Two opens the boss route.
world_three_boss_complete	Set after the final non-combat interaction.
world_three_treasure	Stores ownership of Creator's Light.
train_unlocked_routes	Array of available station IDs; never infer only from scene position.
campaign_level / xp	Continues from the previous world and returns to the Gallery.
identity_scores / moments	Continues the shared 16-identity record.

Accessibility minimum

- ☐ Subtitles with speaker names and scalable text; short sentences and replay dialogue button.
- ☐ Colour cues repeated with icon, shape, sound, and optional vibration.
- ☐ Reduced flash, reduced particles, camera shake slider, and motion-safe platform option.
- ☐ Combat assist: slower enemy attacks, wider parry/dodge window, and boss phase restart.
- ☐ Puzzle assist after two misses; skip reflection and identity questions without losing progress.

Final build checklist

- ☐ Train route stays locked until the previous world completion flag is saved.
- ☐ Milo explains what happened, why help is needed, the goal, and the reward in simple language.
- ☐ The full first-play path fits 14–16 minutes without rushing dialogue.
- ☐ Two quests and three boss phases each have clear start, progress, complete, and saved states.
- ☐ All three normal enemy types and the boss use readable telegraph and recovery states.
- ☐ The player uses the sword, but the final story action restores rather than kills.
- ☐ Eight identity moments score the correct axis and may be skipped without penalty.
- ☐ All visuals, sounds, prompts, and hazards have at least one non-colour and non-audio cue.
- ☐ The treasure appears only after boss COMPLETE and the new train route unlocks only after the treasure save.
- ☐ Returning to the Gallery preserves XP, inventory, settings, creation/music choices, and identity scores.

DONE MEANS Creator's Light is complete when the player can make useful objects with a simple ungraded tool, protect those creations in readable sword fights, defeat the Perfect Blank's armour, place an unfinished idea, receive Creator's Light, unlock every train route, and reach the Art Castle identity finale.

End-state vision for Creator's Light Kingdom: the route is restored, the treasure is earned, and the next Crown Railway state is clear.
