ARTÉA • WORLD TWO SIMPLE DEVELOPER GUIDE

HEART MELODY

Story Journey, Identity Tracking, Quests, Combat, Boss & World Building

Heart Melody Kingdom production concept — Nature leads; Magic and Technology support the experience.

IDENTITY PHRASE A living music valley where every feeling becomes a safe sound and every sound helps the path grow.

Version 1.0 • 14 August 2026 • Prepared for David Sovann and the ARTÉA team

DOCUMENT ORIENTATION

How to use this guide

A simple shared reference for story, level design, environment art, gameplay, audio, UI, accessibility, and Godot implementation.

Purpose

This guide turns the proposal for Heart Melody Kingdom into one short playable journey. It follows the same structure and visual language as the World One guide while keeping the scope small enough for a practical Godot production.

DESIGN MANDATE Feelings are never enemies and are never labelled good or bad. The sword only breaks the Silence Blight that traps emotion; the player restores safe expression and balance.

Guide contents

- 1. World identity and the three-force design balance
- 2. Continuing 16-identity tracking system
- 3. Player journey from train arrival to the next unlock
- 4. Timing, quests, learning prompts, rewards, and XP
- 5. Godot-friendly enemies, sword combat, and boss flow
- 6. Level route, required objects, and visual reference board
- 7. Technical rules, accessibility, save data, and build checklist

Production target

Target	Decision
First-play time	14–16 minutes as part of the previously agreed three-world 55–70 minute campaign
Quest count	2 main quests + 1 boss encounter
Combat scope	3 normal enemy types + 1 boss; all use readable state loops
Identity scope	8 optional micro-decisions; 2 for each identity axis
Level shape	One linear route with shortcuts and a clear return to the train

PART 1

World Identity

Heart Melody Kingdom gives one force a strong visual lead while the other two remain visible and useful.

Identity field	Approved direction
Chapter theme	My feelings have a voice.
Dominant force	Nature
Supporting forces	Magic and Technology
Treasure	Harmony Jewel
Guardian	Archangel Raphael — healing and emotional balance
Player guide	Mayor Milo — explains the mission, operates sound technology, and protects the player
Opening state	World One is complete. The Crown Railway can now carry the player from the Gallery to Heart Melody Station.
Completion unlock	Creator's Light Station and the train shortcut controls

How the three forces combine

Force	Visual share	Use in this world
Nature	55%	Waterfalls, flowers, trees, living instruments, wind, rain, and a valley that responds to emotion.
Magic	30%	Feelings become coloured sound, paths grow from music, and Raphael protects the Harmony Jewel.
Technology	15%	Milo's consoles translate feeling into moving platforms, bridges, lights, and safe routes.

WORLD RULE A living music valley where every feeling becomes a safe sound and every sound helps the path grow.

Story overview

The player rides the newly unlocked Crown Railway into a valley that has lost its music. Mayor Milo asks for help because the Harmony Jewel is trapped inside the final silent note. The player gives safe voices to different feelings, fights creatures made by the Silence Blight, joins the sounds into one song, and frees the Silent Conductor. Raphael returns the Harmony Jewel, and the train opens the route to World Three.

PART 2

Continuing 16-Identity Tracking

World-specific choices quietly add evidence to the same four-axis identity record used across the full ARTÉA journey.

PLAYER PROMISE The result is a friendly mirror, not a diagnosis. The player may skip any identity choice, and no answer changes XP, combat power, treasure, or quest success.

Shared scoring model

Axis	A	B	What it watches
Energy	E — outward connection	I — inner reflection	How the player prefers to recharge or share
Information	S — clear detail	N — possibility	How the player notices and imagines
Decision	T — logic	F — values	How the player weighs a choice
Approach	J — plan	P — adapt	How the player moves through a task

Eight short moments in this world

Each moment adds one point to one side only after a deliberate player choice. A neutral or skipped response saves the moment as complete but adds no point. Never show a ‘correct’ animation.

ID	Moment	Choice A	Choice B	Score
HM_ID_01	Station arrival	Share a feeling with Milo	Reflect privately	+E / +I
HM_ID_02	First duet	Perform beside Milo	Rehearse alone, then join	+E / +I
HM_ID_03	Waterfall sound	Imagine the feeling behind it	Notice the exact sound pattern	+N / +S
HM_ID_04	Flower garden	Combine sounds into new meaning	Match visible petals and notes	+N / +S
HM_ID_05	Fear bells	Choose the clearest safe route	Choose the route helping creatures	+T / +F
HM_ID_06	Heart Song mix	Balance the music structure	Balance emotional comfort	+T / +F
HM_ID_07	Repair order	Set a clear sequence first	Follow the active instrument	+J / +P
HM_ID_08	Boss duet	Use planned cue order	Adapt to the live beat	+J / +P

The 16 friendly identity names

The final four-letter result is calculated only after all three worlds. Use the friendly name first and keep the code secondary. A tie uses the most recent deliberate choice; if still tied, show two possible names and let the player choose.

Code	Friendly name	Code	Friendly name
ISTJ	The Steady Keeper	ISFJ	The Caring Guardian
INFJ	The Quiet Guide	INTJ	The Vision Builder
ISTP	The Skillful Explorer	ISFP	The Gentle Artist
INFP	The Hopeful Dreamer	INTP	The Curious Inventor
ESTP	The Brave Adventurer	ESFP	The Joyful Performer
ENFP	The Spark Starter	ENTP	The Idea Challenger
ESTJ	The Strong Organizer	ESFJ	The Community Builder
ENFJ	The Heart Leader	ENTJ	The Bold Pathfinder

Save data required

Field	Type	Purpose
identity_scores	Dictionary	Eight integer totals: E, I, S, N, T, F, J, P.
identity_moments	Dictionary	Moment ID to chosen option, neutral, or skipped.
identity_result	String	Calculated code after World Three; empty before the finale.
identity_name	String	Friendly name selected or accepted by the player.
identity_consent	Boolean	Whether the player wants the result shown and saved.

IMPLEMENTATION Store identity data in the campaign SaveData resource. Do not keep separate world-only profiles and never reset scores at a station.

PART 3

The Player Journey

Read this section in order: it follows what the player sees, learns, fights, earns, and unlocks from the train arrival to the world ending.

Simple journey map

1. Ride the Crown Railway into the new kingdom.
2. Meet the guardian and hear the problem and mission from Milo.
3. Complete Quest One and learn the world's main interaction.
4. Complete Quest Two and prepare the final route.
5. Fight the boss in three clear phases.
6. Receive Harmony Jewel and unlock Creator's Light Station and the train shortcut controls.

1. Train arrival — the quiet valley

After World One, the player may finally use the train. The Crown Railway leaves the Art Castle Gallery and arrives at Heart Melody Station. The valley is beautiful, but its waterfalls, flowers, drums, bells, and giant strings make no sound. Milo explains that the Silence Blight trapped the valley's feelings and sealed the Harmony Jewel inside the last note.

- Walk from the station to the Quiet Meadow while Milo teaches the sound-colour guide.
- Defeat two Echo Moths with the sword and activate the first music console.
- Meet Raphael as a light projection; accept the mission without a forced dialogue choice.

STORY NOTE Raphael: "A healthy heart does not sing only happy songs. Every feeling needs a safe place in the music."

2. Quest One — Give the feelings a voice

Milo leads the player through the Drum Garden and Sadness River. The player strikes frustration drums to build strong platforms, then plays soft sadness notes so raindrops lift a small boat. Hush Vines and a Rhythm Golem block the route, but their dark shells open when the correct sound plays.

- Complete one three-beat drum pattern; each correct beat creates a platform.
- Guide the rain boat through three water gates by choosing soft note groups.
- Fight two Hush Vines and one Rhythm Golem; attack only while the sound-exposed core is open.

STORY NOTE Milo: "Strong feelings are not wrong. We can give them a safe shape and a safe sound."

3. Quest Two — Build the Heart Song

At the Fear Bell Grove, warning bells show which path is safe and which path needs care. In the Peace Flower Sanctuary, quiet flowers slow the broken machines. The player then adds a hopeful tune that brings morning colour back to the sky. Every restored sound becomes one layer of the Heart Song.

- Read three bell signals and choose the safe path without a fail-state punishment.
- Wake four peace flowers to slow two moving hazards.
- Choose one of three hopeful melodies; all choices are valid and change the final music layer.

STORY NOTE Milo: “We do not remove fear or sadness. We listen, stay safe, and let every feeling have room.”

4. Boss — the Silent Conductor

The Heart Song opens the Harmony Stage. The Silent Conductor is not an evil person; it is a suit of Silence Blight armour holding the valley’s final note. The player fights the armour, restores three music sections, and then adds the Hope Note. The armour breaks and the Conductor becomes the gentle keeper of the valley’s music.

- Phase 1: defeat Echo Moths and activate three rhythm stones.
- Phase 2: use sadness, fear, and peace sounds to expose the armour, then use sword attacks.
- Phase 3: strike the exposed blight core three times and finish by playing the Hope Note.

STORY NOTE The final input is a music action, not a killing blow.

5. Reward — a new route opens

The last note opens and reveals the Harmony Jewel, shining with every feeling colour. Raphael thanks the player and Milo. They return by train to the Gallery, where the Jewel joins the Star of Wisdom. Creator’s Light Station appears on the Destination Wheel, and the train shortcut controls wake up.

- Save the Harmony Jewel reward and World Two completion flag.
- Unlock Creator’s Light Station and the optional shortcut controls.
- Keep the player’s campaign XP, equipment, accessibility settings, and identity scores.

STORY NOTE Raphael: “Your feelings matter. Your heart has a beautiful voice.”

PART 4

Timing, Quests, Learning Prompts & Rewards

Keep the chapter short, readable, and generous. Identity choices and learning prompts never remove rewards.

First-play timing

Section	Time	Included play
Arrival and mission	1–2 min	Station, tutorial reminder, two Echo Moths, Raphael projection
Quest 1: Give feelings a voice	4 min	Drums, rain boat, Hush Vines, Rhythm Golem
Quest 2: Build the Heart Song	4 min	Fear bells, peace flowers, hope melody
Boss: Silent Conductor	4–5 min	Three readable phases and final Hope Note
Reward and train unlock	1 min	Harmony Jewel, Gallery return, World Three route

Quest and unlock table

Step	Main objective	Reward	Story unlock
Quest 1	Restore drums and sadness river	40 quest XP + enemy XP	Heart Song layers 1–2
Quest 2	Restore fear, peace, and hope	45 quest XP + enemy XP	Harmony Stage opens
Boss	Free the Silent Conductor	70 boss XP	Harmony Jewel + World Three station

Short learning prompts

Place	Prompt	Implementation / hint
Drum Garden	Which action gives frustration a safe rhythm?	Play the marked three-beat pattern; retry with Milo's slow cue.
Sadness River	What helps the rain boat rise?	Use soft notes; no answer removes XP or health.
Fear Bell Grove	Which bell warns that a path needs care?	Follow colour, icon, vibration, and sound together.
Final song	Can different feelings stay in the same song?	Yes. The mix changes, but every valid choice completes the quest.

QUIZ RULE A wrong answer gives a helpful response and an immediate retry. It never removes health, XP, identity points, treasure, or access.

PART 5

Sword Combat, Enemies & Campaign XP

All enemies are small, readable, and possible with standard Godot scenes, navigation, timers, hitboxes, and animation states.

Enemy roster

Enemy	HP	XP	Simple behaviour loop	Player answer
Echo Moth	25	5	Hover, telegraph a sound pulse, dash once, pause	One clean sword hit; simple CharacterBody3D chase
Hush Vine	50	10	Stationary root grab, one-second recovery	Sound cue opens core for two hits
Rhythm Golem	75	15	Slow beat stomp, short walk, long recovery	Dodge the circle and hit during recovery
Silent Conductor	220 armour/ core	70	Three scripted phases; two attacks per phase	Boss state machine; final music interaction

Shared Godot enemy scene

Node / resource	Purpose
CharacterBody3D	Enemy movement and collision. Stationary enemies may use Node3D instead.
NavigationAgent3D	Simple chase path; stop before attacks and never chase outside the arena.
Area3D Hurtbox / Hitbox	Receive sword damage and apply enemy damage with separate collision layers.
AnimationPlayer	Telegraph, attack, recovery, hit, and defeat animations.
Timer	Attack cooldown and readable recovery window.
EnemyData Resource	HP, XP, speed, damage, and scene references without copied scripts.
State enum	IDLE → CHASE → TELEGRAPH → ATTACK → RECOVER → HIT → DEFEATED.

Campaign level rule

- Expected campaign range: Level 3 at arrival and Level 4 after completion. Never reset the player's level at the station.
- Normal enemies award XP once. Quest and boss rewards are saved immediately.
- Identity decisions, quiz answers, accessibility assists, and reflection skips give no XP difference.
- If balancing changes global thresholds, keep the world reward total proportional rather than adding more enemies.

PART 6

Boss Encounter

The boss uses combat because the hero carries a sword, but the story ending remains restorative instead of violent.

Final encounter: Silent Conductor

Phase	Threat	Player task	Completion state
1 — Release the beat	Echo Moths and muted rhythm stones	Defeat adds; activate three stones	Beat track starts and phase gate opens
2 — Restore the voices	Armour sends wide silence waves	Play sadness, fear, and peace phrases; strike exposed armour	Three feeling colours return
3 — Join the harmony	Core pulses between safe lanes	Dodge, strike core three times, play Hope Note	Conductor is freed; Harmony Jewel appears

Boss implementation

- Use one BossController with explicit INTRO, PHASE_1, TRANSITION, PHASE_2, PHASE_3, RESTORE, and COMPLETE states.
- Lock progression triggers while a transition animation is running; save only after COMPLETE.
- Show attack zones on the ground for at least 0.75 seconds and provide high-contrast and reduced-flash settings.
- If the player falls, restart the current phase with full healing items; do not replay the whole world.
- The final story action is an interaction prompt. Sword damage cannot trigger the treasure reveal by itself.

BOSS ACCEPTANCE Feelings are never enemies and are never labelled good or bad. The sword only breaks the Silence Blight that traps emotion; the player restores safe expression and balance.

PART 7

Level Route & Required World Objects

Build one understandable journey. Reuse modular pieces and keep decorative density lower around combat, prompts, gates, and train controls.

Linear route

#	Area	Player purpose
0	Art Castle Gallery	Choose Heart Melody on the Destination Wheel; train ride begins.
1	Harmony Station / Quiet Meadow	Arrival, mission, tutorial reminder, first fight.
2	Drum Garden	Frustration rhythm puzzle and platform creation.
3	Sadness River / Waterfall Organ	Rain boat, note gates, Hush Vines.
4	Fear Bell Grove / Peace Flowers	Safe-path reading, slow hazards, hope melody.
5	Harmony Stage / Raphael Sanctuary	Boss, Harmony Jewel, return portal to station.

Important object groups

Ref.	Object group	Purpose for designer / developer
01	Harmony Station and train platform	World entrance, Milo briefing, return point, route-unlock feedback.
02	Waterfall Organ and rain boat	Turns sadness notes into water lifts, gates, and a safe moving platform.
03	Drum Garden and rhythm platforms	Creates solid paths from frustration beats; supports one short timing puzzle.
04	Fear Bell Grove and path lights	Marks safe, warning, and needs-care routes with sound, colour, icon, and vibration.
05	Peace flowers and emotion plants	Slow machines, show feeling colours, and provide calm checkpoints.
06	Harmony Stage, Jewel, Raphael, and boss	Final combat arena, three song anchors, reward reveal, guardian conversation.

Simple dressing kit

- 6 modular ground pieces: straight, corner, T-junction, small plaza, stairs, and arena edge.
- 3 large landmarks, 6 medium landmarks, and 12 small props; reuse materials and colour variants.
- 1 checkpoint style, 1 interaction pedestal, 1 quest marker, 1 locked gate, and 1 unlocked gate.
- 3 terrain plants, 3 rocks/crystals, 2 lamps, 2 benches, 2 signs, and 3 particle effects.
- Keep a clear 2.0–2.5 metre walkable path and avoid placing props inside enemy or camera safety zones.

PART 8

Object Architecture Reference

This board gives the art team a shared shape language. The numbered table states what each group must do in the playable build.

Heart Melody Kingdom object reference board. Treat forms and colours as direction; use the purpose table as the implementation authority.

Ref.	Object name	Required gameplay purpose
01	Harmony Station and train platform	World entrance, Milo briefing, return point, route-unlock feedback.
02	Waterfall Organ and rain boat	Turns sadness notes into water lifts, gates, and a safe moving platform.
03	Drum Garden and rhythm platforms	Creates solid paths from frustration beats; supports one short timing puzzle.
04	Fear Bell Grove and path lights	Marks safe, warning, and needs-care routes with sound, colour, icon, and vibration.
05	Peace flowers and emotion plants	Slow machines, show feeling colours, and provide calm checkpoints.
06	Harmony Stage, Jewel, Raphael, and boss	Final combat arena, three song anchors, reward reveal, guardian conversation.

MODELLING RULE Build the large silhouette and gameplay collision first. Add small decoration only after the object works at the correct camera distance.

PART 9

Technical, UI, Audio & Accessibility Rules

Keep the systems modular, saveable, readable without one sensory channel, and small enough to test every week.

World-specific implementation

- Use five synchronized audio stems: drums, rain, bells, flowers, and hope melody. Save only the selected variation IDs.
- Every sound clue also needs colour, shape/icon, and optional controller vibration. Never require hearing alone.
- Moving platforms read a MusicSignal event; the puzzle does not directly control transforms from UI code.
- The final song combines restored stems. It may sound different after player choices, but completion requirements stay equal.

Required save flags

Field	Purpose
world_two_started	Set after the station arrival finishes.
world_two_quest_1	Set after Quest One reward and checkpoint.
world_two_quest_2	Set after Quest Two opens the boss route.
world_two_boss_complete	Set after the final non-combat interaction.
world_two_treasure	Stores ownership of Harmony Jewel.
train_unlocked_routes	Array of available station IDs; never infer only from scene position.
campaign_level / xp	Continues from the previous world and returns to the Gallery.
identity_scores / moments	Continues the shared 16-identity record.

Accessibility minimum

- ☐ Subtitles with speaker names and scalable text; short sentences and replay dialogue button.
- ☐ Colour cues repeated with icon, shape, sound, and optional vibration.
- ☐ Reduced flash, reduced particles, camera shake slider, and motion-safe platform option.
- ☐ Combat assist: slower enemy attacks, wider parry/dodge window, and boss phase restart.
- ☐ Puzzle assist after two misses; skip reflection and identity questions without losing progress.

Final build checklist

- ☐ Train route stays locked until the previous world completion flag is saved.
- ☐ Milo explains what happened, why help is needed, the goal, and the reward in simple language.
- ☐ The full first-play path fits 14–16 minutes without rushing dialogue.
- ☐ Two quests and three boss phases each have clear start, progress, complete, and saved states.
- ☐ All three normal enemy types and the boss use readable telegraph and recovery states.
- ☐ The player uses the sword, but the final story action restores rather than kills.
- ☐ Eight identity moments score the correct axis and may be skipped without penalty.
- ☐ All visuals, sounds, prompts, and hazards have at least one non-colour and non-audio cue.
- ☐ The treasure appears only after boss COMPLETE and the new train route unlocks only after the treasure save.
- ☐ Returning to the Gallery preserves XP, inventory, settings, creation/music choices, and identity scores.

DONE MEANS Heart Melody is complete when the player can follow one clear route, safely express different feelings through sound and action, win readable sword fights, free rather than destroy the final boss, receive the Harmony Jewel, and see Creator's Light appear on the train.

End-state vision for Heart Melody Kingdom: the route is restored, the treasure is earned, and the next Crown Railway state is clear.
