ARTÉA • COMPLETE SHORT CAMPAIGN

THREE WORLDS

A 55–70 Minute Story, Quest, Combat & Godot Production Guide

01 MIND SPARK

Technology / Science leads • Understand thoughts • Star of Wisdom

02 HEART MELODY

Nature leads • Give feelings a safe voice • Harmony Jewel

03 CREATOR'S LIGHT

Magic / Creativity leads • Create without perfection • Creator's Light

MAIN SCOPE DECISION Keep the full first campaign at 55–70 minutes. Each world is a short 14–16 minute chapter with two quests and one boss. The game is not three times longer.

Version 1.0 • 14 August 2026 • Prepared for David Sovann and the ARTÉA team

CAMPAIGN DECISION

Same Total Playtime, Three Complete Worlds

The earlier 55–70 minute World One plan is now shared across Mind Spark, Heart Melody, and Creator's Light.

DESIGNED PATH About 61 minutes: 5 minutes opening + 15 minutes per world + two 2-minute train transitions + 7 minutes for the Castle finale. Exploration, retries, and optional reflection create the 55–70 minute player range.

Stage	Location	Target	Story and gameplay
Opening	ARTÉA Town + Art Castle	5–6 min	Meet Mayor Milo, fight the tutorial, enter the castle, and see the locked train.
World 1	Mind Spark	14–16 min	Two quests, two enemy families, one boss, and the Star of Wisdom.
Transition	First train unlock	1–2 min	Place the Star, wake the train, and ride to Heart Melody.
World 2	Heart Melody	14–16 min	Two quests, two enemy families, one boss, and the Harmony Jewel.
Transition	World Three route	1–2 min	Place the Jewel and ride to Creator's Light.
World 3	Creator's Light	14–16 min	Two quests, two enemy families, one boss, and the Creator's Light.
Finale	ARTÉA Castle	5–7 min	Join the treasures, choose an identity, receive the Crown of Life, and open free travel.

Total content budget

- 3 worlds, each with 2 short quests and 1 three-stage boss.
- 6 normal monster designs, but only 2 shared Godot enemy script templates.
- 15 main story tasks: 5 tasks in each world, including the boss.
- 6 required game choices: 2 in each world. Personal questions stay optional.
- Levels 1–5 across the complete campaign, not Levels 1–5 inside every world.
- The Crown Railway cannot be ridden before World One is complete.

PLAYER VALUE RULE The player fights corrupted Blight shells and dangerous machines. Thoughts, feelings, creativity, Milo, guardians, and friendly creatures are never treated as enemies.

PART 1

The Complete Player Journey

The three kingdoms are short chapters of one connected story. Every treasure changes the Art Castle and opens the next step.

Opening — Mayor Milo asks for help

ARTÉA Town • Meet the mayor and walk to the Art Castle

The player arrives with a crystal sword. Mayor Milo explains that Static Blight creatures are draining the town and the Art Castle has gone dark. He asks for help and leads the player toward the castle. Two weak creatures teach movement, dodge, block, and sword attack. Milo opens the castle with the town key.

The locked railway and the first gate

Art Castle Main Gallery • Understand the full mission

Inside the Gallery, the player sees three empty treasure displays and the Crown Railway behind a dark seal. Milo explains that the train has no power and cannot be ridden. The Mind Spark World Gate is the only open path. The player must recover the first treasure to wake the train, then use the train to reach the other kingdoms.

Chapter One — Wisdom

Mind Spark Kingdom • Understand one thought and free the Star of Wisdom

The player clears Static Blight from a living computer forest, collects Thought Sparks, reads a simple pattern, and faces the Thought Storm Warden. The final Hope action frees the Guardian and turns the storm into gentle rain. The Star of Wisdom opens the return World Gate.

First train ride — The heart route

Art Castle Gallery Station • Wake the railway and travel to World Two

The player places the Star in the Gallery. The dark railway seal breaks, and the train wakes for the first time. Mayor Milo and the player board together. Heart Melody becomes the first destination. The short ride shows Mind Spark shining behind them and the green valley ahead.

Chapter Two — Feeling and connection

Heart Melody Kingdom • Give feelings a safe voice and earn the Harmony Jewel

The valley is silent because Discord Blight has trapped the instruments. The player fights the Blight shells, uses drums, bells, water, and flowers to express different feelings, and helps Milo reconnect the music machines. The Silent Conductor boss is defeated when the player combines different feeling sounds into one honest chord.

Second train ride — The creation route

Heart Melody Station • Place the Jewel and open World Three

The Harmony Jewel powers the next railway line. The train plays the player's short melody during the ride. Creator's Light appears as a world of blank frames, floating shapes, glass seeds, and silver pipes waiting for imagination.

Chapter Three — Creativity

Creator's Light Kingdom • Make one brave mark and earn the Creator's Light

Blank Blight creatures erase paths and cover useful objects. The player fights them, uses a small creation palette to make a bridge, door, tree, or light, and learns that art does not need to be perfect. The Perfect Blank boss falls when the player uses an unfinished creation as the final answer.

Finale — The Crown of Life

ARTÉA Castle • Join the three treasures and celebrate the player's light

The train returns to the castle. The Star of Wisdom, Harmony Jewel, and Creator's Light become the Light of Identity. Milo offers two or three friendly identity suggestions, but the player may choose another or say, 'I am still discovering.' The Maker shapes the light into the Crown of Life. Free train travel and replay open as post-game rewards.

PART 2 • WORLD ONE

Mind Spark — The Wisdom Chapter

Identity: Technology / Science leads • Treasure: Star of Wisdom

TIME 14–16 minutes total: Quest 1 (4–5 min) • Quest 2 (4–5 min) • Boss and reward (5–6 min).

Mayor Milo enters through the World Gate with the player, explains the four goals, and then remains beside a safe Mayor's Beacon. The player clears Blight, collects four Thought Sparks, repairs the Wisdom Path, and defeats the Thought Storm Warden.

#	Quest	Required fight	Other tasks	Short choice	Unlock
1	Wake the Network	2 Static Mites + 1 Glitch Sprout	Power 1 forest node; collect 2 Sparks.	Which root still has no power?	Court opens.
2	Read the Pattern	1 Static Mite + 1 Glitch Sprout	Move 3 points; collect 2 Sparks; choose fact or fear.	Is this happening now, or might it happen?	Boss path opens.
Boss	Thought Storm Warden	Boss + up to 2 Mites	Power 3 anchors; break shield; attack core; place Hope.	What is one helpful next step?	Star and return gate.

Boss alignment

1. Focus: defeat two summoned Mites and switch on three anchors.
2. Understand: move the three shield points into the clear pattern.
3. Act: strike the exposed core during two openings, then place the Hope tile instead of making a killing blow.

World One result

- The storm becomes gentle rain and the Star grows from the Oldest Tree.
- The player reaches Level 2 and gains 110 maximum health.
- The player returns through the World Gate. The train wakes only after the Star is placed in the Gallery.

PART 3 • WORLD TWO

Heart Melody — The Feeling Chapter

Identity: Nature leads; Technology and Magic support • Treasure: Harmony Jewel

TIME 14–16 minutes total: Quest 1 (4–5 min) • Quest 2 (4–5 min) • Boss and reward (5–6 min).

The player and Mayor Milo arrive by train. Waterfalls, flowers, drums, bells, and glowing strings fill the valley, but the music is trapped inside Discord Blight. Feelings are not the enemy. The player fights only the shell that is stopping the feelings from being expressed safely.

#	Quest	Required fight	Other tasks	Short choice	Unlock
1	Wake the Feeling Garden	2 Echo Moths	Touch 3 flowers and match joy, sadness, or fear to a sound.	Which sound fits this feeling?	Drum bridge opens.
2	Build the Harmony Bridge	2 Rhythm Golems	Play 3 drum beats; Milo turns them into platforms.	What is a safe way to show this feeling?	Boss stage opens.
Boss	Silent Conductor	Boss + 2 Echo Moths	Restore 3 instruments; block sound waves; attack mute core.	Which two feelings can sing together?	Harmony Jewel.

Boss alignment

1. Listen: defeat the Echo Moths and turn on drums, bells, and strings.
2. Respond: dodge or block the Conductor's clear sound rings in the shown rhythm.
3. Connect: attack the mute core during two openings, then play one chord made from two different feeling sounds.

World Two result

- The valley's full song returns, with all feelings represented as colours and sounds.
- The player reaches Level 3 and unlocks the strong sword attack.
- The Harmony Jewel powers the Creator's Light route on the train map.

PART 4 • WORLD THREE

Creator's Light — The Creativity Chapter

Identity: Magic / Creativity leads; Technology and Nature support • Treasure: Creator's Light

TIME 14–16 minutes total: Quest 1 (4–5 min) • Quest 2 (4–5 min) • Boss and reward (5–6 min).

The world contains blank frames, floating shapes, glass seeds, and silver pipes. It is waiting for the player's imagination. To keep the short campaign realistic in Godot, the player uses simple shapes, colours, and picture stamps. The game changes approved artwork into prebuilt 3D objects; it does not need to turn any freehand drawing into a new 3D mesh.

#	Quest	Required fight	Other tasks	Short choice	Unlock
1	Make the First Mark	3 Ink Sprites	Choose shapes and create 1 bridge or door from a stamp.	Which tool helps you continue?	Creation garden opens.
2	Grow the Creation Garden	2 Blank Sentinels	Create a tree or light; choose colour; grow 3 glass seeds.	What do you like about your creation?	Perfect Blank opens.
Boss	The Perfect Blank	Boss + 2 Ink Sprites	Create cover; stop eraser waves; attack blank core.	Will you share one unfinished picture?	Creator's Light.

Boss alignment

1. Begin: place a bridge, shield, or light stamp so the player can reach the arena core.
2. Try again: dodge eraser waves, rebuild one removed object, and defeat the Ink Sprites.
3. Share: strike the exposed Blank core during two openings, then place an unfinished picture into the final frame.

World Three result

- The empty space grows into a landscape using colours and shapes chosen by the player.
- The player reaches Level 5 by the end of the world and receives one post-game skill point.
- The Creator's Light completes the treasure set and opens the Art Castle finale.

PART 5

Combat, Monsters & XP Across Three Worlds

The normal enemies change their art and one main attack, but reuse only two Godot script templates.

World	Enemy	Shared script	HP	XP	One main attack
W1	Static Mite	MobileEnemyBase	25	10	Ground lunge; one sword hit.
W1	Glitch Sprout	GuardEnemyBase	50	15	Seed shot; open core after firing.
W2	Echo Moth	MobileEnemyBase	50	20	Flying sound ring; block or dodge.
W2	Rhythm Golem	GuardEnemyBase	75	30	Two-beat ground slam; attack during pause.
W3	Ink Sprite	MobileEnemyBase	25	10	Ink dash; one sword hit after the dash.
W3	Blank Sentinel	GuardEnemyBase	75	30	Eraser shield; attack when the frame opens.

Boss scope

Boss	Health	Three-stage structure	Reward
Thought Storm Warden	200 core HP	Anchors → pattern → two damage openings → Hope action	50 XP + Star
Silent Conductor	200 core HP	Instruments → sound rhythm → two damage openings → harmony chord	75 XP + Jewel
Perfect Blank	200 core HP	Create cover → eraser pattern → two damage openings → unfinished art	100 XP + Light

Level plan

Level	Total XP	Reward
1	0 XP	Start: light attack, block, dodge, 100 health.
2	100 XP	After World One: 110 health.
3	250 XP	During or after World Two: strong sword attack.
4	430 XP	During World Three: perfect block can return a projectile.
5	600 XP	End of World Three: post-game skill point and free travel.

- Each of the six normal quests gives 15 completion XP. Required fights, three bosses, and these six rewards give about 645 XP in total.
- The player reaches Level 2 after World One, Level 3 in World Two, Level 4 in World Three, and Level 5 after the final boss. No grinding is needed.
- Keep a maximum of three normal enemies active in the short campaign, or two normal enemies during a boss phase.
- Player defeat returns to the last checkpoint with XP, treasures, completed tasks, and solved puzzles kept.

PART 6

Godot 4.7 Production Plan

The three-world campaign stays possible by sharing code, limiting unique systems, and building pre-authored content instead of expensive procedural technology.

CURRENT PROJECT FIT The ARTÉA player already has health, sword attack, block, Area3D hit detection, and take_damage(amount, source). All enemies and bosses should use this contract.

Godot item	Implementation rule
MobileEnemyBase.tscn	CharacterBody3D, simple collision, detection Area3D, attack Area3D, optional hover setting, AnimationPlayer, health, XP, and one attack timer.
GuardEnemyBase.tscn	CharacterBody3D, simple collision, open/closed hurt state, AnimationPlayer, health, XP, and one ranged, slam, or shield attack.
BossBase.tscn	CharacterBody3D, 200 core HP, phase enum, two core openings, three interaction nodes, checkpoint signal, reward signal, and final non-killing interaction.
CampaignState	Stores world completion, treasure ownership, train routes, level, XP, quest steps, checkpoints, optional answers, and post-game free travel.
Crown Railway	A short real ride scene with destination lock states. Before World One: no ride action. After each treasure: add only the next route.
Mind Spark puzzle	Three selectable pattern points, four Sparks, two nodes, simple choice UI, and two world lighting states.
Heart Melody puzzle	Four pre-recorded sound loops, quantized buttons, three instruments, moving platforms, and one combined final chord.
Creator's Light tool	Use four prebuilt object stamps—bridge, door, tree, light—with chosen colour/material. Do not generate arbitrary 3D meshes from drawings.
Renderer limits	For mobile/GL Compatibility: low-poly meshes, 1–2 materials per enemy, simple shadows, short particles, limited transparent layers, and LOD meshes.

Build order

1. Finish the town, castle entrance, locked railway, and Mind Spark World Gate state.
2. Build the two shared enemy bases and prove all six enemy variations work with the current sword.
3. Build one BossBase and test the Mind Spark boss before making the other boss variations.
4. Finish the full World One loop and first train unlock.
5. Add Heart Melody using pre-recorded sounds and existing platform systems.
6. Add Creator's Light using prebuilt stamps and colour/material choices.
7. Connect the three treasures, Castle finale, identity choice, Crown of Life, and free travel.
8. Test the 55–70 minute target, mobile frame rate, saving, checkpoints, combat assist, and reduced motion.

DO NOT OVERBUILD Do not create a full procedural music engine, AI drawing-to-3D system, six separate enemy codebases, or three different train systems for this short campaign.

PART 7

Castle Finale & Acceptance Checklist

The final 5–7 minutes bring the three discoveries together without adding a fourth full world.

Finale sequence

1. The train returns from Creator's Light and enters Celebration Mode.
2. The player places the Creator's Light beside the Star of Wisdom and Harmony Jewel.
3. The three treasures become the Light of Identity.
4. Milo shows two or three friendly identity suggestions based on saved choices.
5. The player chooses one, selects another, or chooses 'I am still discovering.'
6. The Maker creates the Crown of Life and reminds the player that the treasures did not create their value.
7. A star receives the player's chosen name or symbol. Free railway travel and world replay open.

FINAL MESSAGE Your story matters. You are uniquely created. Your light has a place in this universe.

The campaign is ready when

- ☐ A normal first playthrough finishes in 55–70 minutes, including all three worlds and the Castle finale.
- ☐ World One can be entered without riding the train, and the train stays sealed until the Star is placed.
- ☐ Each world contains exactly two short quests, two normal enemy families, and one three-stage boss.
- ☐ All required fights and story rewards give enough XP to reach Level 5 without grinding.
- ☐ The player can finish the story after a defeat without losing XP, treasure, solved puzzles, or completed tasks.
- ☐ Feelings, thoughts, creativity, Milo, guardians, and friendly creatures are never attack targets.
- ☐ Heart Melody uses pre-recorded sounds and Creator's Light uses prebuilt object stamps, keeping both systems practical in Godot.
- ☐ World completion, treasure placement, train routes, levels, XP, checkpoints, and the finale save and load correctly.
- ☐ No normal encounter has more than three enemies, and the project meets the mobile/GL Compatibility frame-rate target.
- ☐ Subtitles, larger text, symbols, combat assist, reduced motion, checkpoints, optional reflection, and skip work correctly.

ARTÉA • THE COMPLETE SHORT JOURNEY

THINK • FEEL • CREATE

Mind Spark

Understand your thoughts.

Heart Melody

Give your feelings a safe voice.

Creator's Light

Create with courage, not perfection.

55–70 MINUTES • THREE TREASURES • ONE CONNECTED STORY
