ARTÉA • WORLD ONE • CLEAN INTEGRATED EDITION

MIND SPARK

Story Journey, Quests, Objects, Combat, Characters, Identity System & Godot Build Guide

Actual Art Castle Galaxy world reference. New objects must keep this low-poly, readable game style.

WORLD IDENTITY A living computer forest where thoughts grow like stars and wisdom reorganizes the path.

Version 3.1 • 14 August 2026 • Levels 1–5 • 55–70 minutes

DOCUMENT ORIENTATION

How to use this guide

This is one clean source for the current world. It replaces the older guide-plus-addendum layout.

> **LATEST-VERSION RULE** Use the story, characters, guardian, train, objects and rules in this file. Do not combine them with earlier versions. The old repeated sections and old character samples are removed.

What this file controls

- The full 55–70 minute player journey, four quests, ten main tasks and three-stage boss.
- The world identity, route, functional objects, architecture, enemies and reward.
- One shared player outfit, one Mayor Milo outfit and one female Mother Guardian model.
- One shared Crown Train used only as optional travel after a world is complete.
- One 16-identity tracker that continues through all three worlds.
- Simple Godot scenes, signals, Resources and save flags that the team can build.

Document map

Part	Section	Main use
1	World identity	Visual rules and current world image
2	Player journey	Story from arrival to reward
3	Quest plan	Time, tasks, six zones and bird’s-eye build map
4	Functional objects	Objects that change play or story
5	World architecture	Godot-ready building and dressing kit
6	Combat	Five enemy types, boss and XP
7	Shared cast	Player, Milo and Mother Guardian
8	Train	One optional Crown Train and three station skins
9	Identity system	Sixteen friendly identities and save data
10	Implementation	Build order, sources and acceptance checks

PART 1

Mind Spark identity

A living computer forest where thoughts grow like stars and wisdom reorganizes the path.

Identity lock

Rule	Approved direction
Lead force	Technology / Science, about 55–60% of a gameplay view
Shape rule	Angles, grids, lines, nodes and clear circles; nature grows through the network
Must read from distance	Server-tree skyline, storm rings and Oldest Tree
Do not borrow	No Heart instruments/water-organ language; no Creator canvas/frame/stamp language

How the three forces work

- Technology and science lead through networks, evidence tools, gates and data light.
- Nature supports through server trees, living roots, rain and forest growth.
- Magic supports through Thought Sparks, the Star, the Guardian and truth paths.

Current game reference

The current game already builds Mind Spark at (-600, 0, 1640) with low-poly primitives, circuit tiles, logic gates, server trees, the Thought Storm and the Oldest Tree sanctuary.

> **STYLE TEST** From a long distance, a player must know which world they are in before reading any text. Keep the approved skyline, shape language and colour balance.

PART 2

The player's journey

Read this section like the player is moving through the game from the first step to the final reward.

Why Milo asks for help

The player begins in the town and meets Mayor Milo. A strange Blight is spreading from the Art Castle. It covers living things with dark shells and turns broken magic and machines into monsters. Milo asks for help because the player's crystal sword can break the shell without hurting the life inside. He leads the player to the Art Castle.

> **STORY RULE** The Blight shell is the enemy. The living world, feelings, thoughts and unfinished ideas are not enemies. The sword breaks the shell and helps restore what is inside.

1. Town, Art Castle and the first World Gate

Milo shows the player the Gallery, three World Gates and the parked Crown Train. He explains that the train is only for later travel to completed worlds. A violet light opens the Mind Spark World Gate. The player walks through it while Milo explains that the Star of Wisdom is missing and the Thought Storm is covering the forest.

2. Quest One — Wake the Living Network

The player follows dark server trees and glowing roots. They defeat Static Mites and Glitch Sprouts, wake two Checkpoint Server Roots and collect the first two Thought Sparks. The forest starts to show a safe cyan route.

3. Quest Two — Read the Broken Pattern

At the Evidence Scanner, the player separates one fear from one fact. They connect three large nodes on the Memory Constellation Board and place evidence in the Logic Gate. The Mother Guardian gives a short hint when asked, but she never answers for the player.

4. Quest Three — Build the Hope Path

The player turns the Perspective Lens, makes the Truth Bridge solid and defeats a Root Stalker and Blight Sentinel. Each clear choice changes the route instead of grading the player. The final path leads to the Thought Storm Arena.

5. Quest Four — Free the Thought Storm Warden

The player dodges wide storm lines, breaks three dark anchors and attacks the open crystal core. When the core reaches zero health, combat stops. The player places the final Spark in the Calm Rain Basin. The storm becomes gentle rain instead of being destroyed.

6. Reward and next step

The Oldest Tree wakes and reveals the Star of Wisdom. The player receives the Wisdom Blade. Mind Spark Station becomes available for optional travel, but the story returns through the World Gate. In the Art Castle, the Star opens the Heart Melody World Gate.

End state

The player owns the Star of Wisdom and Wisdom Blade. Mind Spark is saved, its station is an optional completed-world destination, and the Heart Melody World Gate is ready.

PART 3

Quest, timing and level route

All three worlds use the same story length and the same amount of main content, while their tasks stay different.

Target	Approved value
First-play target	55–70 minutes without optional exploration
Main structure	4 quests • 10 required story tasks • 1 three-stage boss
Combat	5 normal enemy types • no more than 4 normal enemies at one time
Identity	8 small evidence moments inside existing scenes; no extra quest
Level band	Levels 1–5
Completion reward	Star of Wisdom + Wisdom Blade + Heart Melody World Gate

Four-quest plan

#	Quest	Required tasks	Required fight	Time	Reward / unlock
1	Wake the Living Network	Wake two server roots; collect two Sparks.	Mites and Sprouts	12–14 min	75 XP + safe route
2	Read the Broken Pattern	Scan FACT/FEAR; connect three memory nodes; open the Logic Gate.	Wisps	12–14 min	100 XP + truth route
3	Build the Hope Path	Turn the Lens; form the bridge; clear the elite guard.	Stalker and Sentinel	12–15 min	125 XP + boss route
4	Free the Warden	Break three anchors; damage the core; place the last Spark.	Boss + small adds	17–23 min	200 XP + Star + Blade

> **TIME RULE** If playtesting is shorter than 55 minutes, add exploration, dialogue or one more use of an existing object. Do not add a fifth quest or a new system.

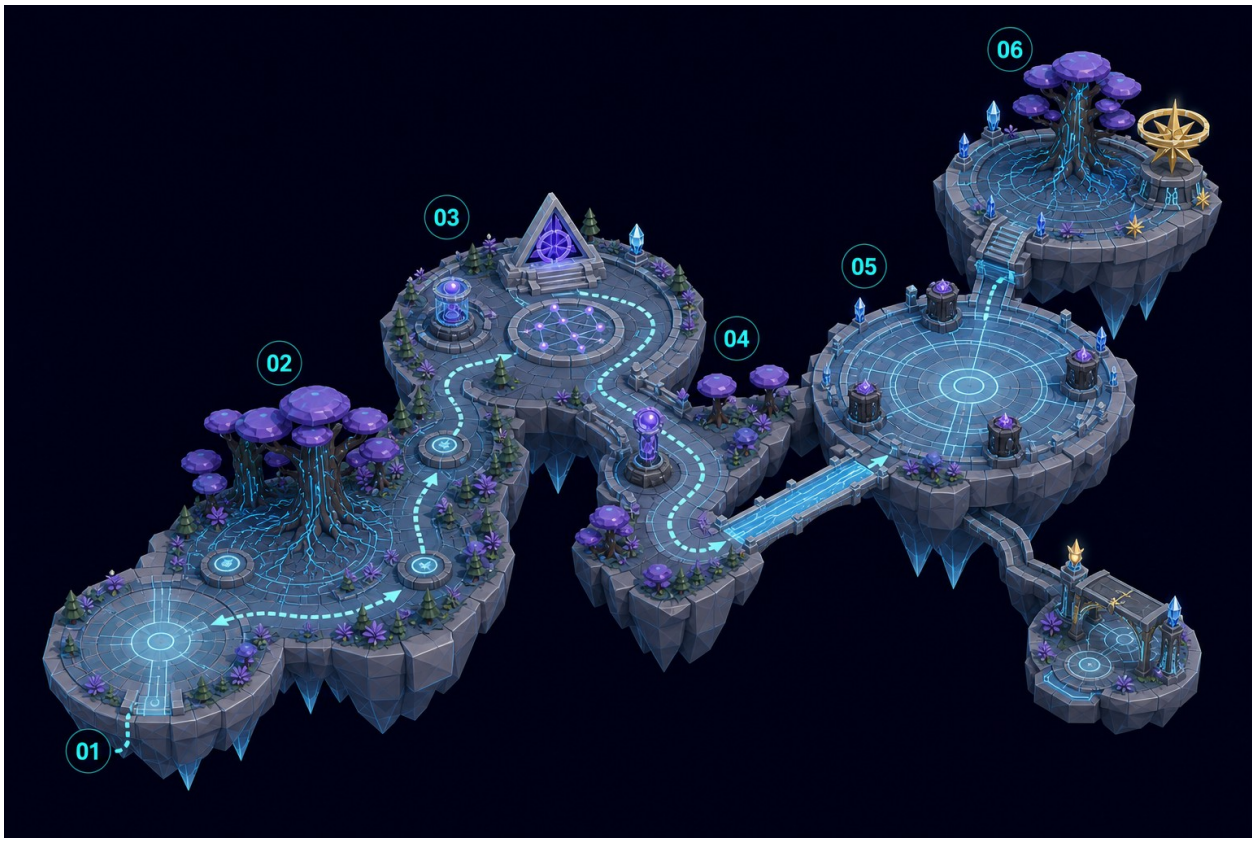

Six-zone route

#	Zone	Purpose
1	World Gate Landing	Briefing, first checkpoint and safe combat reminder.
2	Living Network Forest	Server roots, first Sparks and small enemies.
3	Constellation Court	Evidence, memory pattern and Logic Gate.
4	Hope Path Ridge	Perspective Lens, Truth Bridge and elite fight.
5	Thought Storm Arena	Three boss anchors, open core and Calm Rain Basin.
6	Oldest Tree Sanctuary	Star, Wisdom Blade, identity reflection and return gate.

Save gates

> **SAVE RULE** Save after each quest and before the boss. A retry keeps earlier quests. Save the treasure before opening the next World Gate or adding this completed world to the train menu.

Bird’s-eye world build blueprint

Mind Spark bird’s-eye blueprint. Follow 01–06 in order; the small station spur is optional travel after completion.

> **GREYBOX RULE** Build the six zone floors and the main walking path first. Add the World Gate, checkpoints, boss arena and final sanctuary next. Add the station side spur last; it must never block the story route.

PART 4

Functional quest and puzzle objects

Every object in this section gives the player an action, clear feedback or useful story progress. None is only decoration.

Mind Spark — Thinking Tools and Puzzle Objects — approved game-style object sheet.

SHARED OBJECT RULE Build one QuestObjectBase scene with an interaction Area3D, prompt, current state, completion signal, save ID and optional AnimationPlayer. Each object below is a small child setup or Resource, not a new full system.

Object implementation list

#	Object	Player action	Story result	Godot build	Clear feedback
01	Thought Spark Socket	Place one found Spark.	Shows 0/3, 1/3, 2/3, then opens the linked task.	Node3D + Area3D + three MeshInstance3D pips + AnimationPlayer.	Big count, icon and sound.
02	Evidence Scanner	Scan one clue, then choose FACT or FEAR.	Saves one evidence result and updates the gate.	Area3D + two large buttons + Label3D/icon planes + Resource data.	Star/check and cloud/warning; colour is extra.
03	Perspective Lens	Turn the lens to one of three fixed angles.	Reveals one hidden path beam.	StaticBody3D + Area3D + three saved rotation steps + Tween.	Clicks at each step; reset button.
04	Memory Constellation Board	Connect three large nodes in order.	Restores one memory and gives a Spark.	Area3D sockets + Array order + thin link meshes + AnimationPlayer.	Wrong link gently clears; no score loss.
05	Logic Gate Arch	Place the correct evidence pair.	Gate opens and the next path lights.	StaticBody3D + two socket Area3D nodes + AnimatableBody3D door.	Lock icon, 0/2 count and open sound.

#	Object	Player action	Story result	Godot build	Clear feedback
06	Truth Bridge Tile	Choose the true statement at a nearby prompt.	The ghost tile becomes a safe solid tile.	StaticBody3D collision toggled from quest state + material tween.	Solid shape change plus glow and tone.
07	Focus Bell Beacon	Ask for help or wait 45 seconds with no progress.	Points to the current required object only.	Area3D + Timer + Label3D arrow + AudioStreamPlayer3D.	Hint can be off; never solves the puzzle.
08	Warden Anchor	Dodge, then strike the open crystal ring.	Breaks one boss shield layer.	StaticBody3D + Hurtbox Area3D + state enum + crack animation.	Large telegraph, safe arrow and long recovery.
09	Calm Rain Basin	Place the final Spark after the boss stops.	Changes the storm into gentle rain.	Area3D + AnimationPlayer + particle and audio state swap.	Clear HOLD prompt; no timed input.
10	Identity Reflection Mirror	Choose one short answer after the quest.	Adds evidence to the 16-identity tracker; no identity is chosen yet.	Area3D + simple Control choice + PlayerIdentityTracker signal.	Private, skip and replay options; no right answer.
11	Checkpoint Server Root	Use it to save, heal or read the current task.	Stores progress and gives a safe pause.	Area3D + SaveManager call + heal signal + quest text panel.	One action button and clear three-item menu.
12	Clear Path Projector	Turn on an optional ground guide.	Draws a dotted route to the next task.	Area3D + Path3D/Line3D-style mesh + goal Marker3D.	Can be turned off; route uses dots and a star.

Meaningful-use check

- ☐ The object is placed where its result can be seen from the interaction point.
- ☐ The prompt says one small action and shows progress such as 0/3 or 1/3.
- ☐ Success uses shape, icon, text and sound; colour is extra support.
- ☐ A reset or help choice is available for any sequence puzzle.
- ☐ Quest completion is saved before the next gate, path or reward opens.

PART 5

World architecture and production objects

Build the clear route and gameplay collision first. Add world dressing after every quest can be completed from start to finish.

Mind Spark architecture blueprint — low-poly modules sized for the existing Art Castle Galaxy world.

Architecture implementation list

#	Object	Shape / gameplay use	Godot build	Plan	Source
01	Floating island shell	Reuse current faceted island; BoxMesh/CylinderMesh cliff modules over a StaticBody3D floor.	StaticBody3D + MeshInstance3D + CollisionShape3D; perimeter recovery Area3D.	REUSE	art_castle_floating_world.gd island primitives
02	Circuit path kit	3–4 m modular straight/corner/T/plaza/ramp pieces; cyan line stays visible.	StaticBody3D; BoxMesh floor; thin emissive MeshInstance3D; snap on 1 m grid.	MODIFY	current 8×8 rune tiles and circuit routes
03	Arrival/root bridge	One 4 m clear bridge with 1.1 m rails, root lamps and aligned end sockets.	StaticBody3D + 3 BoxMesh pieces; optional root Curve3D/MeshInstance3D.	MODIFY	current procedural bridge helpers
04	Server-tree family	Short/medium/tall tower-tree; dark glass trunk, cyan data seam, violet canopy, fibre roots.	Node3D prefab; BoxMesh/CylinderMesh; MultiMeshInstance3D for repeated canopies; no trunk animation.	REUSE	current ServerTree nodes + nature tree meshes
05	Fear Gate	Triangular gate with one Spark socket; teaches fear versus fact.	StaticBody3D frame + Area3D socket + AnimationPlayer + Label3D/icon plane.	REUSE	current FearGate geometry
06	Proof/Truth gates	Proof uses three evidence sockets; Truth uses safe turning rings and gold success state.	Node3D + Area3D sockets + AnimationPlayer; TorusMesh rings; signal puzzle_completed.	REUSE	ProofGate + WhatElseIsTrueGate
07	Truth-ring / Hope path	Rotating truth rings unlock staged gold/cyan path tiles and flowers.	TorusMesh + Tween; path StaticBody3D toggled by quest state; GPUParticles3D for growth.	MODIFY	current logic gate/path helpers
08	Constellation Court	Round readable puzzle court with movable thought nodes and link lines.	StaticBody3D dais; Area3D drag/sockets; ImmediateMesh or thin cylinders for links.	REUSE	current ConstellationCourt cubes/links
09	Thought Sparks	One shared collectible with shape/material variants for fear, fact, proof, hope and wisdom.	Area3D + MeshInstance3D + AnimationPlayer + OmniLight3D; Resource for type/state.	MODIFY	current constellation cubes and Star material
10	Mayor beacon/checkpoint	Safe hint, save, retry and Milo briefing point; never blocks the path.	Node3D + Area3D + Label3D + OmniLight3D + AudioStreamPlayer3D.	NEW	use current beacon/light primitives
11	Thought Storm arena	Circular arena, three anchors, layered storm rings, core lane and gentle-rain completion state.	StaticBody3D arena; Node3D boss anchors; TorusMesh rings; GPUParticles3D; checkpoint Marker3D.	MODIFY	current ThoughtStorm cloud rings
12	Oldest Tree sanctuary	Tallest landmark; ramp/stairs, glowing roots, Guardian mark and Star pedestal.	StaticBody3D platform; tree prefab; Area3D reward; AnimationPlayer; rain particles.	REUSE	current OldestTree/Star sanctuary

Production inventory

Group	Objects included	Production rule
Traversal	Island shell; circuit straight/corner/T/plaza; stairs; ramp; arrival/root bridge; arena edge; recovery volume	Reuse/MODIFY procedural primitives; one collision kit
Technology forest	3 server-tree sizes; fibre root; data monolith; console; root lamp; status crystal	Reuse current runtime forms; MultiMesh repeated dressing
Puzzle	Fear Gate; Proof Gate; Truth Gate; Spark socket; constellation node/link; reset; hint beacon	One PuzzleBase script plus Resources for rules
Quest/magic	Thought Spark variants; Hope tile; memory seed; thought flower; wisdom flower; Star pedestal	One collect/place state machine; colour + icon, never colour alone
Combat	Five enemies; boss; focus anchor; telegraph decal; projectile; checkpoint; rain-complete VFX	Shared EnemyBase/BossController and object pools
Characters	One fox; one permanent Mayor Milo; one unified female Guardian Angel; dialogue/photo/safe-zone markers	Shared scenes only; no world costume variants; earned player gear is attached as child meshes
Dressing	Lavender tree; pine; fern; grass; rock; crystal; bench; sign; edge lamp; firefly/moth/bird	Reuse installed nature and house libraries
World states	Sleeping; waking; gentle rain	Same geometry; swap materials, lights, particles and saved state

PART 6

Monsters, combat, XP and boss

The enemy designs use simple shapes, one shared state machine and large safe telegraphs that are possible in Godot.

Enemy and boss reference only. The old character panels are removed; use the shared character sheets in Part 7.

Enemy roster

Entity	Look and attack	HP	XP	Simple Godot recipe
Static Mite	Small circuit insect; short lunge, then long pause.	25	10	CharacterBody3D + NavigationAgent3D + capsule + Timer
Glitch Sprout	Rooted crystal plant; clear seed-bolt line.	50	15	Node3D + projectile Marker3D + Hurtbox Area3D + Timer
Circuit Wisp	Floating orb; slow bolt can be blocked.	50	20	CharacterBody3D + sphere collision + projectile scene
Root Stalker	Low charge; rear crystal is the weak point.	75	30	CharacterBody3D + RayCast3D + rear Hurtbox
Blight Sentinel	Slow elite; front shield and open cyan chest.	150	60	CharacterBody3D + shield state + chest Hurtbox
Thought Storm Warden	Three anchors, open crystal core and calm-rain end state.	300	150	BossController + phase enum + anchors + core + arena signals

BALANCE NOTE HP and XP are first-pass values. Test with the current sword before final tuning. Keep the same hitbox, damage and save systems across all enemies.

Shared enemy state machine

- IDLE → NOTICE → TELEGRAPH → ATTACK → RECOVERY → IDLE.
- Give every normal attack at least 0.75 seconds of warning. Use CharacterBody3D, NavigationAgent3D, one capsule, one Hurtbox Area3D and one Hitbox Area3D.
- Use no more than four normal enemies at one time. On defeat, the dark shell dissolves and the living part is shown as calm, free or safely gone.

Three-stage boss flow

Stage	Player action	Result
1 — Slow	Dodge storm lines and clear small enemies.	The first anchor opens for a long safe hit window.
2 — Break	Strike three anchors after their clear pulse.	The dark shell falls away and the core appears.
3 — Free	Damage the core, then place the final Spark.	Combat ends and the storm becomes gentle rain.

GUARDIAN BOSS LINE ‘The storm is hurt and confused. Break the dark anchors, then help it become rain.’

PART 7

Shared player, Mayor Milo and Mother Guardian

These three characters keep one body, one face and one main outfit in all worlds. Only the player's earned equipment changes.

Player character

Use the current orange fox and permanent green outfit in every world.

- Keep one Player scene, one skeleton, one green outfit and the current sword animations.
- Attach rewards to named EquipmentSocket children; do not replace the full player model.
- The sword damages only Blight shells and combat targets. Puzzle objects use a separate interaction layer.

Unlock	Equipment	Effect	Simple rule
Start	Base Sword	25 damage	Current sword, hitbox and timing.
Mind complete	Wisdom Blade	30 damage	Same hitbox and timing; visual crystal upgrade only.
Heart complete	Harmony Shield	50% frontal damage reduction	Hold block; no parry, stamina or shield attack.
Creator complete	Creator Star	20-damage straight bolt	One projectile, 4-second cooldown, no skill tree.

Mayor Milo

One elder Mayor Milo model and one navy mayor-professor outfit for all three worlds.

- Milo is a wise elder mayor and a caring father-like guide.
- He asks for help, explains the mission, gives short task reminders and celebrates progress.
- He never fights, blocks the route or solves the player's puzzle.
- Godot: one CharacterBody3D or Node3D guide scene, AnimationTree, dialogue Area3D and Marker3D guide points.

Female Mother Guardian

Approved current Guardian: lighter warm light-beige skin, kind eyes, silver hair and one nature-magic-technology design.

Item	Approved rule
Role	She welcomes, comforts, protects, restores, gives hints and reflects the player's growth.
Body	One mature female humanoid; warm light-beige skin; kind eyes and gentle smile.
Hair and halo	Long silver hair with leaves and flowers; one gold branch halo.
Outfit	One ivory, sage, teal and gold leaf-panel gown used in every world.
Wings	Three simple rigid wing panels on each side; cyan, violet and green with gold veins.
VFX	Warm heart light, small leaves, stars and music notes; protection dome is optional.
Combat	She never attacks. She gives a safe line and points to the next clear action.
Godot	One humanoid rig, 5–7 rigid gown panels, 3 wing bones per side, AnimationPlayer and GPUParticles3D.

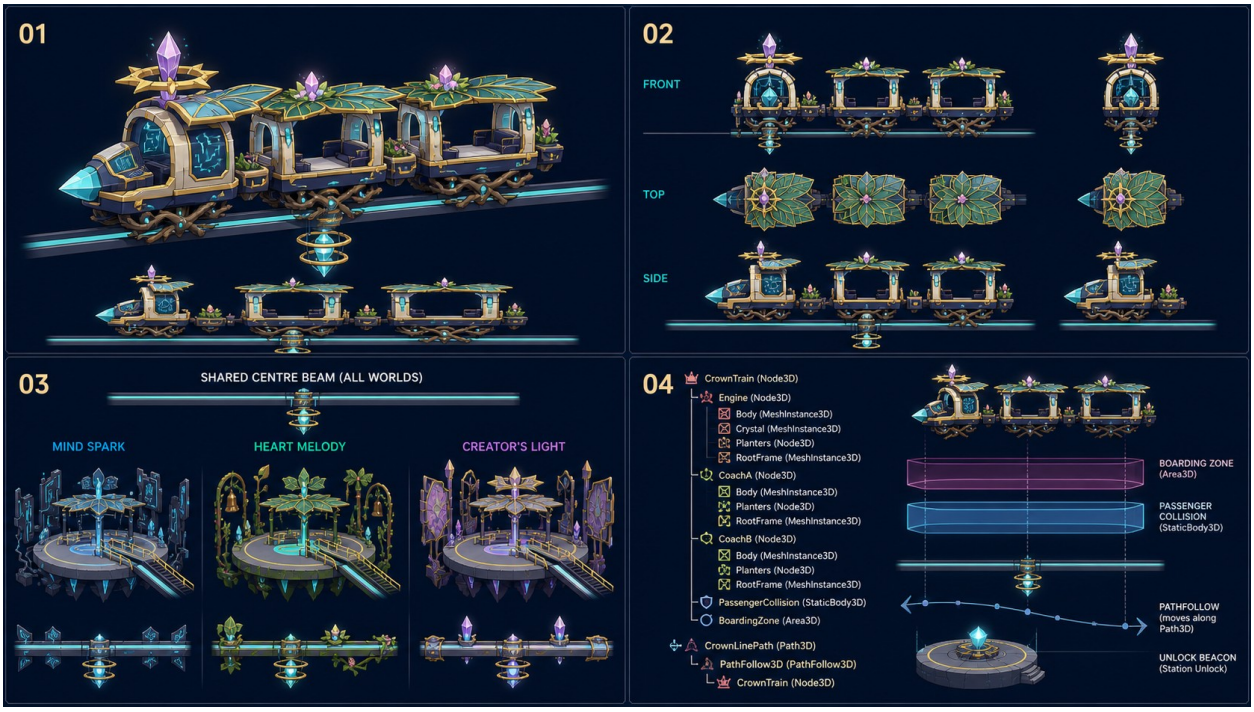

Her work in Mind Spark

- **Voice:** 'A thought can feel strong without being a fact. Let us look for one clear sign.'
- **Puzzle:** She points to the active clue, but she does not choose FACT or FEAR for the player.
- **Boss:** 'The storm is hurt and confused. Break the dark anchors, then help it become rain.'
- **Reflection:** 'What helped you move forward when the path was not clear?'

PART 8

One shared Crown Train and simple travel rule

The train is a small optional travel service. It is not the main story, and it never carries the player into the next unfinished world.

One permanent Crown Train for the full game: technology + magic + nature in one simple design.

Part	Approved design / rule	Godot build
Train scene	One engine and two open coaches; the model never changes between worlds.	Node3D train root + child meshes + simple seats
Technology	Navy chassis, cyan glass and circuit strips, gold joints.	Shared materials and low-poly meshes
Magic	Violet crystals, gold star halo and soft lift light.	MeshInstance3D + small emissive material + particles
Nature	Root underframe, leaf roof and small planters.	Curve3D/root mesh + low-poly leaf children
Rail	One centre beam, 3.2 m wide and 1.6 m high.	StaticBody3D beam modules; one collision box
Movement	Authored automatic route only; no manual driving or rail switches.	Path3D + PathFollow3D + AnimationPlayer doors
Menu	Choose Art Castle or a completed world, then confirm.	One small Control menu backed by saved destination IDs
Story	The next unfinished world always opens through an Art Castle World Gate.	WorldGateController separate from train data

Travel flow

- The player completes a world and the treasure reward is saved.

- That completed world is added to the Crown Train destination menu.
- The player may walk back through the World Gate or use the train to return to the Art Castle.
- Later, the player may use the train to revisit the Art Castle or any completed world.
- The next story world is entered through its World Gate, never through the train.

Different station and rail skins

World	Station visual child	Rail visual child
Mind Spark	Circuit arch, server-tree columns and cyan node lights.	Dark beam with cyan circuit seam.
Heart Melody	Leaf-petal canopy, water-note columns and bell sign.	Stone/root beam with aqua note lights.
Creator's Light	Asymmetric frame, pencil lamps and violet glass seed sign.	Ivory beam with violet and gold frame marks.

> **DO NOT BUILD** No three separate trains, no onboard quest, no manual driving, no branching rail puzzle and no train requirement for story progress.

PART 9

Shared 16-identity tracking system

The game quietly keeps small evidence across all three worlds. It gives one friendly identity only at the Art Castle finale.

> **IDENTITY SAFETY RULE** Identity evidence is separate from XP, combat, treasure and quest success. There is no right answer, no bad identity and no identity result before the finale.

Four friendly choice axes

Axis	Simple name	What the game observes
E / I	Energy	Talk and act with others / think and act quietly
S / N	Focus	Notice clear details / notice patterns and possibilities
T / F	Decision	Use reason and rules / use care and personal values
J / P	Approach	Plan the order / explore and adapt

Eight evidence moments in Mind Spark

Save ID	Existing game moment	Axis
MS_ID_01	Town reply to Milo	E / I
MS_ID_02	First route exploration	S / N
MS_ID_03	Evidence choice	T / F
MS_ID_04	Puzzle order	J / P
MS_ID_05	Ask for help or try alone	E / I
MS_ID_06	Pattern detail or big picture	S / N
MS_ID_07	Boss safe-path choice	T / F
MS_ID_08	Reflection order	J / P

Sixteen friendly identity names

Code	Friendly name	Code	Friendly name
ENFJ	The Guiding Light	INFJ	The Quiet Visionary
ENFP	The Joyful Creator	INFP	The Gentle Peacemaker
ENTJ	The Bold Architect	INTJ	The Wise Strategist
ENTP	The Bright Spark	INTP	The Deep Thinker
ESFJ	The Warm Guardian	ISFJ	The Faithful Shield
ESFP	The Radiant Star	ISFP	The Silent Artist
ESTJ	The Steadfast Builder	ISTJ	The Loyal Keeper
ESTP	The Fearless Explorer	ISTP	The Calm Craftsman

Simple save data

Field	Type	Purpose
identity_axis_counts	Dictionary	Eight integer counts: E, I, S, N, T, F, J and P.
identity_evidence_ids	PackedStringArray	Stops the same moment from being counted twice.
identity_answer_history	Array[Dictionary]	Keeps moment ID, chosen side and world ID for testing.
identity_result_code	String	Empty until the Art Castle finale; then one four-letter code.
identity_locked	bool	False until the player accepts the finale result.
identity_reveal_seen	bool	Lets the reveal be replayed without recounting evidence.

Implementation rules

- Use one autoload named PlayerIdentityTracker for all three worlds.
- Record only the first answer for each evidence ID unless the player starts a new save.
- A skipped or private reflection records no axis and never blocks the quest.
- Save after each evidence moment and test checkpoint restart, boss retry, World Gate return and train travel.
- At the finale, compare each pair, build the four-letter code and show its friendly name.

PART 10

Godot implementation and handoff

Build shared systems once, keep world scenes modular and test the full route before adding more decoration.

Core shared scenes

Scene / system	Purpose
player_3d.tscn	Current fox, health, sword, block and three EquipmentSocket nodes.
mayor_milo.tscn	One elder Milo guide scene and permanent navy outfit.
guardian_angel.tscn	One approved female Mother Guardian used unchanged everywhere.
enemy_base.tscn	Shared hitbox, hurtbox, navigation, telegraph, recovery, XP and dissolve.
boss_controller.gd	INTRO, PHASE_1, TRANSITION, PHASE_2, PHASE_3, COMPLETE.
quest_object_base.tscn	Interaction, prompt, state, save ID and completion signal.
world_gate.tscn	Story progression between Art Castle and the current world.
crown_train.tscn	One train with PathFollow3D and destination menu for completed worlds.
station_base.tscn	One station collision/boarding scene with a world visual child.
PlayerIdentityTracker	Autoload for all identity evidence and finale result.

Recommended build order

1. Block out the six-zone route with StaticBody3D floors, World Gate, checkpoints and boss arena.
2. Connect navigation, recovery volumes and save flags; test walking from start to finish.
3. Build QuestObjectBase and the ten required story tasks with placeholder meshes.
4. Build EnemyBase, the five enemy Resources and XP rewards; test no more than four at one time.
5. Build the boss phases and retry checkpoint using placeholder shapes.
6. Add the world architecture kit and keep all paths, prompts and weak points clear.
7. Add the current player, one Milo and one approved Mother Guardian scene.
8. Add reward equipment, the next World Gate flag and the completed-world train flag.
9. Connect the eight identity evidence moments and test save/reload.
10. Add final materials, particles, audio and decoration after the full route passes.

Official implementation sources

Source	Link	Use in this guide
Godot Area3D	Open official page	Use for player entry, interaction, sockets, hitboxes and safe zones.

Source	Link	Use in this guide
Godot AnimatableBody3D	Open official page	Use for simple moving doors, bridge parts and platforms.
Godot Path3D	Open official page	Use for the shared train, Rain Boat and simple guided movement.
Godot NavigationAgent3D	Open official page	Use for basic enemy movement inside a clear combat area.
Godot Resource	Open official page	Store small puzzle, enemy and reward data without making many scripts.
Godot MultiMeshInstance3D	Open official page	Reuse many trees, flowers, grass or crystals with lower cost.
Xbox clear goals	Open official page	Show the current goal, progress, task list and optional help.
Xbox more than colour	Open official page	Use shape, icon, text and sound with colour for important information.
Xbox difficulty help	Open official page	Let puzzle help and combat help be changed separately.

Final acceptance checklist

- ☐ The guide contains one current story and no older repeated story section.
- ☐ First play is 55–70 minutes with four quests and ten required story tasks.
- ☐ All required objects have a visible action, result, save state and Godot node plan.
- ☐ The bird’s-eye blueprint shows zones 01–06, one story path and a secondary station spur.
- ☐ The world reads as its own identity and does not copy another world’s main shapes.
- ☐ The player keeps one green outfit; only the three simple rewards change.
- ☐ Mayor Milo keeps one elder design and does not fight.
- ☐ The approved lighter-skin Mother Guardian keeps one body, outfit and wing design.
- ☐ Five enemy types and the boss use clear telegraph, attack and recovery states.
- ☐ The boss frees the living world instead of destroying a thought, feeling or idea.
- ☐ The next story world opens only through a World Gate.
- ☐ The one Crown Train lists only Art Castle and completed worlds.
- ☐ The 16-identity evidence survives save, reload, boss retry and travel.
- ☐ Important information uses text, icon, shape and sound, not colour alone.
- ☐ The full route works before final decoration and particles are added.

DONE MEANS Mind Spark is complete when the player can follow one clear 55–70 minute route, finish four meaningful quests, win readable fights, free the boss, receive Star of Wisdom and Wisdom Blade, open Heart Melody World Gate and add this completed world to optional train travel.
